NOW THAT'S A CPRS - TUCKEY

“The Coalition Climate Change response is a truly measurable “Carbon Pollution Reduction Scheme” as it rewards those who reduce their carbon footprint, whilst Rudd’s ETS is a process by which the polluter pays to pollute and passes the cost down the line” Mr Tuckey said today.

“The funding for a major study into the HVDC high efficiency transmission system will prove the benefits that such a system will provide in bringing low emission natural gas based energy, and major low cost, no emission, renewable power to Australian Consumers, thus guaranteeing our energy future and electricity prices that reduce as the infrastructure cost is paid off, but the free energy remains, see my website www.wilsontuckey.com.au Practical Solutions to Climate Change and go to the EU- MENA segment”.
